level ${ }^{[1]}$ certification, based on the ANSI/BIFMA e3-2012 furniture sustainability standard, sets furniture manufacturers on a path toward greater sustainability over time. Based on environmental and social criteria set forth in the standard, a product's entire supply chain is assessed.

Certification assessment includes an evaluation of specific corporate policies and quidelines and an assessment of associated company manufacturing facilities. Products must meet quantifiable milestones of environmental and social performance at every step of development.

The quantitative assessment addresses four categories: material use, energy and atmosphere impacts, human and ecosystem health and social responsibility.
Manufacturers earn points in each of the four categories. The level ${ }^{T M}$ brand and its numeric rating of 1,2 or 3 indicate what threshold of certification a product has achieved. level ${ }^{T \mathrm{M}} 3$ is the highest rating.

## How do I buy a desk?

Choose a non-reflective surface. Global uses colors that reduce glare to make your work easier to read while reducing eye strain.

Avoid tangles. Make sure your desk has at least one grommet hole to keep computer and telephone wires out of the way.

Get a desk that lets you look ahead. A modular desk is easy to set up initially and then reorganize or reconfigure later to adapt to future needs.

A hutch should have a sweep that manages computer and telephone wires.

Look for European connectors if you're buying ready-to-assemble furniture. Global makes assembly easy - all you need is a screwdriver.

Island worksurfaces let you meet with more than two people at once with ample leg room for all.

Give your business an edge. Each Global desk comes with its own attractive edge design.

Choose one of Global's height/angle adjustable keyboard trays to go with your desk. Your arms can maintain a comfortable position, reducing shoulder, back and neck strain.

## How do I select the right workstation?

When searching for the right workstation it is important to consider its purpose which will be decided by the nature of your tasks. It is best to look for products that have been designed and engineered to help make your workspace more productive.

This can be achieved in a variety of ways. As a guide, observe how your work flows through your office in a typical day. It is likely that you'll uncover a number of distinctive and repetitive task patterns.

## Lighting - Protect yourself

- If you have to setup near a window make sure your computer sits perpendicular to it, minimize eye-strain inducing glare on sunny days.
- If you have fluorescent lights, try to position your set up between the lights.
- Use "Parabolic louvers" to reduce the glare from fluorescent lights
- Use window blinds to control the light source through the day
- Panels or screens may be used to control glare
- Protect your eyes from Ultraviolet A (UVA) and Ultraviolet B (UVB) by using an anti-glare screen

## Noise

- Try to set up your office in a separate room if possible and away from the rest of the house

## Chair

- Comfort is personal but should be part of the selection
- Seat pan design; deep and wide enough
- Rounded front edge (waterfall)
- Adjustable slope seat
- Able to adjust your chair, to obtain appropriate height
- Sit back in your chair, with your thighs parallel to the floor
- Place feet flat on the floor, a footrocker may be required

## Footrocker

- A footrocker helps to prevent possible discomfort resulting from outstretched feet
- The rocking motion creates light activity in the legs and feet and will help stimulate muscles to improve overall circulation

Once these patterns have been identified, organize them according to their intended use and frequency of their use. Now you are ready to investigate the pertinent factors that will determine the workspace you eventually select.

## Keyboard

- Has a palm rest
- Easily adjusts the angle of the keyboard
- Easily adjusts the keyboard height

## Document Holder

- A curved back document holder reduces glare
- Position document holder in line with the monitor to reduce eyestrain

## Monitor

- There should be a direct line from the center of monitor to the, "J" key on your keyboard which should line up with your belt buckle
- Position the monitor at arm's length
- Make sure that the top of your monitor screen is slightly below eye level
- A monitor stand may be used to achieve the desired height

## Workstation

- Adequate space beneath the worksurface for your legs
- Depth of the worksurface depends on the task and equipment used to perform this responsibility
- Try to place tasks that are performed regularly within arm's reach
- Avoid unnecessary reaching and bending which leads to fatigue and possible muscle strains and can reduce efficiency
- Keep in mind other related tasks in your planning
- Establish your workflow then design the essential elements to meet your requirements

## LAMINATE DESK NOTES

## The following applies to all series EXCEPT the Bridges II, Princeton and StreamLINE series.

For information on the Bridges II series, please refer to page 338, for the Princeton series, please refer to page 67 and for the Streamline II series, please refer to page 306.

- Outside and surface panels are made from 1 " thick 45 lb . density particle board and covered on both sides with high performance thermally fused laminate. Modesty panels are $11 / 16^{\prime \prime}$ thick.
- BOX AND FILE DRAWERS use FULL EXTENSION STEEL BALL BEARING SLIDES for smooth action.
- BOX AND FILE PEDESTALS are standard and are CONSTRUCTED INDEPENDENTLY of the chassis, with fully closed bottoms. This PICTURE FRAME CONSTRUCTION technique prevents racking, and provides a product that lasts for years.
- FILE DRAWERS file both legal and letter documents as standard (LETTER FILES will file in BOTH DIRECTIONS, as will LATERAL FILES), except 15 "w Zira units (side to side only).
- Drawers and END PANELS are EDGE BANDED on ALL FOUR SIDES to protect clothing and the floor covering.
- Locks are standard on all box and file pedestals, lateral files, storage cabinets and combination storage units.
- All locking components within each series can be keyed alike at no additional charge. Please specify the request at time of ordering.
- Drawers are opened with side pulls and are constructed $22^{\prime \prime}$ deep (Genoa and Halton $18^{\prime \prime} \mathrm{D}$ ) using French dovetail joints at the front and lap joints at the rear. Woodgrain enameled bottoms are routed into the woodgrain (MDF) sides on three edges.

Provides stability for leg supports

## Table supporting structures - BEAMS

Legs are connected with supporting beams. There is one beam for a single line of tables while two beams connect back-to-back table structures. Adjustable clamps at either end of the beam can be adjusted to accommodate the following applications in both single table as well as back-to-back table configurations.

## STANDARD TABLE BEAM

## Single table beam application (1)

Designed to bridge two legs to form support for a single table, or for two back-to-back worksurfaces Adjustable clamps at either end of the beam are pushed all the way in to allow both table legs to be tucked under the worksurface.

## End of run table beam application (2)

Supports one table leg assembly tucked under the worksurface (one adjustable clamp pushed all the way in), while the other table leg assembly can be shared between two adjacent worksurfaces (adjustable clamp pulled out to extend the beam).

## Interconnecting table beam application (3)

Supports both table leg assemblies extended to support adjacent worksurfaces on either side. Adjustable clamps at either end of the beam are pushed all the way in to allow both table legs to be tucked under the worksurface. Single table beam application supports single table leg assemblies with legs on both sides tucked under the worksurface.

## TELESCOPIC TABLE BEAM (4)

Supports a return connected perpendicularly to a $24^{\prime \prime}$ or $30^{\prime \prime}$ deep primary worksurface. The Telescopic beam is connected to a single or back-to-back leg on one side and to anyworksurface supporting beam on the opposite side. Telescopic beam clamp allows the table leg to be tucked under the worksurface or shared between two adjacent worksurfaces.

## STORAGE TABLE BEAM (5)

The Storage beam is connected to a single or back-to-back leg on one side and to the worksurface on the opposite side - thus saving one leg assembly. Assembly worksurface is connected to storage units with included storage brackets. Storage table beam's flexibility allows for a single table application (with the table leg tucked in under the worksurface) as well as for a double table installation (two adjacent tables supported by a shared leg in the middle and two storage cabinets at the opposite ends.

STORAGE TABLE BEAM ADAPTER (6)

Connects to a storage table beam. This assembly allows a worksurface to be supported by a leg on one side and a spine (formed by interconnected storage cabinets) on the opposite side.

Allows a worksurface to be supported by a leg on one side and storage spine on the opposite side. A typical storage spine is formed by series of Interconnected $21^{\prime \prime}$ or 25 " h storage cabinets of corresponding depth. The $21^{\prime \prime}$ or $255^{\prime \prime}$ adaptors provide structural support, acting as supports between the top of the storage cabinet spine and the bottom of the perpendicular worksurfaces. The flexible leg/beam/adapter assembly arrangement allows the leg to be tucked in under the worksurface or to be shared by two adjacent worksurfaces. Specify Storage Beam nominally 18" shorter than worksurfaces for storage spine support application. Specify BRTSA21 or BRTSA25 depending on height of storage units forming the spine. Includes all hardware necessary to connect the adapter to the beam, worksurface and storage spine.

## POWER DELIVERY / CABLE MANAGEMENT

At the basic level, table and floor based office equipment is serviced by a wall or floor power supply. As the operation grows, there might be a need to organize excessive cable clutter.

Wire Basket (1) connects to the underside of worksurfaces with sprig brackets, and cables are simply dropped and coiled into them. Wire Basket is not to be used with power troughs.

Cable Snake (2) Installed in proximity of floor monument to manage vertical cable clutter..
Table clamped, single circuit Desk Top Power Data Modules (3) deliver services to desk height, while tapping into wall or floor power supply. Again, the excessive cables can be managed with Cable Trays.

Ceiling pole BRTCPP (4) manages power and data cables between ceiling and above or below worksurface power troughs.

Above and Below Worksurface Power/Data Troughs (5) can be installed between back-to-back tables for extended below and above desk height power/data distribution. 8 wire, 4 -circuit system. ( $2+2$ circuit configuration)

NOTE: Specify BRTHH58 (8) to distribute power from double-sided, back-to-back below worksurface power trough to a single-sided, below worksurface power trough at the end of a table run.

Leg shroud (9) attaches to 34 "w legs and manages power floor feed, as well as data cables from floor monument.

Single Sided Power/Data Troughs (6) can be installed to the underside of a single table.

Storage power/data box BRTVCM (7) attaches to storage units and provides access to one duplex/data terminal on top storage surface. Integrated single circuit module can be plugged to floor monument under the storage or to a wall outlet

## COLLABORATIVE SEATING

## D xWxH

Bridges collaborative seating collection consists of seating, privacy screens, tables, tablets and power. It is a versatile modular furniture series which can be configured into many space planning scenarios, including corner, in-line, open concept, traditional reception, as well as secluded seating with high privacy partitions.

Furniture pieces can be used as stand alone items or can be mechanically linked together to form a variety of seating configurations.

Seat and backrest can be integrated with Bridges tables.

Corner tables and in-line 6 " table modules double as power delivery centers.

Dedicated seat backrests feature dual USB charging port.

Some inline 6" table modules are furnished with grommets to support tablets.

Legs are available in standard Bridges metal painted finishes and anodized aluminum finish.

Bridges Collaborative Seating upholstery features a single stitch, thick white thread around the edges. The white, wide stitch along with crisp corners are part of its distinctive personality. In order to achieve crisp edges and to minimize "pillow" effect caused by taut fabric, the upholstery material has been applied deliberately loose, which may over time, produce puckering of the upholstery surface material. This can be easily corrected by stretching the fabric by hand or during vacuuming.

In order to efficiently utilize fabric yield, all $60^{\circ \prime}$ seats and backs feature a seam in the middle. The double stitch seam is sewn with a thin thread, closely matching the upholstery material in color.

Some complicated fabric patterns prevent pattern matching and will be upholstered without the seam at the discretion of the factory.

6" In-line table block

Should you require no middle seam by cutting into the roll, please specify "NO SEAM" at time of your order.

Fully upholstered armless lounge seat with metal base. Seats can be freestanding or linked with optional interlocking bracket kit. - Anodized Aluminum Leg - Add $\mathbf{\$ 6 3}$ list upcharge

## POWER DELIVERY / CABLE MANAGEMENT

DxWxH
At the basic level, table and floor based office equipment is serviced by a wall or floor power supply. As the operation grows, there might be a need to organize excessive cable clutter.
(1) Cable Snake JBPS installed in proximity of floor monument to manage vertical cable clutter.

Table clamped, single circuit (2) Desk Top Power Data Modules deliver services to desk height, while tapping into wall or floor power supply. Excessive cables can be managed with (3) Wire Management Clamps BWMS5.

2

(4) Below Worksurface Power/Data Troughs can be installed between back-to-back tables for
extended below desk height power/data distribution.

- 8 wire, 4 -circuit system. ( $2+2$ circuit configuration)

## To specify electrical, utlize the following steps:

- For each back-to-back worksurface, specify (1) SEDBKIT - SEDBKIT is centered below the wire pass thru on the surface - Unlike other wiring systems, Sidebar's electrical can have individual simplex outlets on different circuits
- Specify a total of (4) simplex outlets per user - up to four different circuits can be specified for a single user
- Jumpers (SExxFFJ) will bring power from one SEDBKIT to another - subtract 6 " from the worksurface length to calculate the necessary length jumper
- Currently, Sidebar can only accommodate basefeeds from a floor or wall
- Basefeeds (SEBFxx) are available in multiple lengths and can be positioned at the end of a run or the middle of a run
- Global recommends the use of a vertical cable manager (such as the JBPS or PCSN01) to manage the basefeed and data cable from floor or wall to the underside of a worksurface

- When supported on one side (by $90^{\circ}$ turn, supporting " $T$ " legs or wall mounting), panels can run two long OR a maximum of $8^{\prime}$ ".
- When supported on both sides (by $90^{\circ}$ turn, supporting " $T$ " legs or wall mounting), panels can run three long OR a maximum of $13^{\prime}$.

For longer, unsupported runs, panels must maintain a $135^{\circ}$ angle (or less) to remain stable.

Third leg kit to be used with a Foli freestanding table to create an electric height adjustable $L$ station. Post leg with return kit replaces one of the T-legs on freestanding table; the T-leg from the freestanding table is then moved to support one side of the return top. Cross bar is included to connect and support the return top to the freestanding table top. May be configured for left or right hand returns. All three legs plug into the freestanding table's controller and the three motors will electronically synchronize. The overall footprint with a return kit is not to exceed 72 " $\mathrm{W} \times 72^{\prime \prime} \mathrm{D}$. The 48 " W return kit is only to be used with a 24 "D primary table. 36 " and 42 " W return kits may be used with either 24 " D or 30 "D primary tables.

Shallow, 8 " wide basket manages cable excess and serves to manage cords and cables. It can be easily unclipped from spring steel brackets (included) to rearrange cable connections from below worksurface. Spring steel brackets can suspend the Cable Basket below the worksurface where it keeps the cords and cables off the floor and manages them along the horizontal plane - between floor monuments and Storage Vertical Cable Manager, for example. Tall storage cabinet's legs provide easy access to the Cable Basket where it can easily be unclipped from spring steel brackets to rearrange cable connections. Steel wire construction, chrome finish baskets; black spring steel hanging brackets, fasteners.

- Custom size tables are priced at next size table price, not to exceed width or length. Example: $44^{\prime \prime} \times 108^{\prime \prime}$ would be priced at the $48^{\prime \prime} \times 120^{\prime \prime}$ price. Contact Customer Service for pricing of tables over $48^{\prime \prime}$ in width. Custom tables less than the smallest size must be quoted.
- Products specified with the high pressure laminate option are finished on the underside of the surface with a kraft paper backing.

## EDGE OPTIONS

- Self, built-up, bullnose, T-mold and slant edges are available on all models. Corners of rectangular, square and boat shaped tables ordered with T-mold or bullnose will be rounded.
- Bullnose edge is available in Black (BK) or Grey (GR) only.
- T-mold edge is available in Black (BK), Grey (GR) or coordinating laminate finish (ME)
- Self edge and built-up edges are same color as laminate finish.
- Metal bases are standard in Chrome (CH). Also available in Black (BLK) or Grey (GR). Please specify when ordering if a color other than Chrome is desired.

- All tables with Drum Bases \& Pedestal require approx. 125 lb . of sand in each base for adequate stability. Sand is not included with Drum Bases.
- If other than a Global standard laminate finish is preferred, contact your customer care Representative. Information needed includes the name of the laminate manufacturer, color name, number and model of table. You will then be given a quote for this special order.

## GROMMETS

- Grommets available in standard table top locations (left, center or right). Order as: AG1, AG2 or AG3. Add \$83.
- Grommet hole dimensions are $31 / 4^{\prime \prime}$ wide $\times 17 / 8^{\prime \prime}$ deep.

- Actual grommet locations will vary according to base selection.

## POWER BLOCK

- A Power Block (model PMSPDM) may be ordered on all worksurfaces.
- A Power Block is a rectangular worksurface power/data module with one electrical duplex receptacle and two data (RJ45) receptacles. 9' black cord included. Power Block dimensions are $31 / 2^{\prime \prime}$ deep $\times 61 / 2^{\prime \prime}$ wide $\times 23 / 4^{\prime \prime}$ high.
- Actual Power Block locations vary according to base selection. The locations will be left (AG1, E1), center (AG2, E2), and right (AG3, E3). Example: 8' table with drum base does not have a modesty panel, so the grommet (AG2) and power block (E2) can be perfectly centered in the table. An $8^{\prime}$ table with a slab base has the modesty panel, so the grommet (AG2) and power block (E2) will be offset alongside the modesty panel.
- To purchase a Power Block, you must specify both the Power Block cut-out location and the Power Block model \#. Order Power Block as PMSPDM, Add \$311.
Power Blocks are available in standard worksurface locations (left, center or right). Order as E1, E2 or E3. Add \$83.

Bungee is a series of freestanding tables and accessories designed for classrooms, training rooms, boardrooms and any other multi-functional space that may require frequent configurations. Tables are sold complete with legs and Bungee cords so they may quickly and easily be connected together without searching for tools or worrying about loose parts.

Bungee tables feature rounded corners with a unique "bubble molding" that is engineered to compress under the tension of the Bungee cords. The compressed molding creates a seal that serves to locate and align interconnected tables while also providing a soft and forgiving edge.

Choose from a variety of top shapes and laminate finishes to create your individual style. In addition, most tables offer a choice of tapered legs or spider legs in a Silver or Black finish with adjustable levellers or optional casters. Optional modesty panels, grommets, wire management and power blocks further enhance your workspace.

Flip-Top tables can be nested and easily stored by activating the single hand release mechanism from the left or right side.

Optional locking casters are available in Silver or Black finish (standard on Flip-Top models).

## TOP \& EDGE OPTIONS

- ConnecTABLES® have nine basic top shapes available in various sizes. All top shapes have a variety of straight or curved edges which are referred to as Working (W), Connecting (C) or End (E) edges. Edges can also have a combination of edge types as shown.
*cannot freestand

Rectangle

Quarter Round*

$45^{\circ}$ Wedge*

Square

$60^{\circ}$ Triangle*

Trapezoid

$90^{\circ}$ Crescent

Half Round

Extended Half Round*

Working Edge (1) - Edges designated with the letter "W" indicate that this is a working or sitting edge. These edges can be connected with optional ganging hardware in free-standing applications.

Connecting Edge (2) - Edges designated with the letter "C" indicate that this is a connecting edge. These edges can be connected to any other connecting edge of equal width, regardless of the top shape or size.

End Edge (3) - Edges designated with the letter " $\mathbf{E}$ " indicate that this is an end edge or an edge that can finish a run of tops. If a top has two end edges it can be freestanding. $90^{\circ}$ crescent tops can be freestanding if the optional center leg is added.

## FREESTANDING AND CONNECTING CONDITIONS

Freestanding tables are defined as any one worksurface supported by two or more legs; connecting tables are defined as more than one work surface supported by a single leg at each point of connection. The rule for determining the quantity of legs of an open configuration is the number of worksurfaces plus one (See Figure 1).

On closed configurations, the number of legs is equal to the number of worksurfaces (See Figure 2). There are some exceptions, such as when optional third legs are used on quarter round or $90^{\circ}$ crescent shapes.

Figure 1. Open Configuration
Number of Surfaces $=5$ Number of Legs $=6$

Figure 2. Closed Configuration Number of Surfaces $=6$ Number of Legs $=6$

- All square, rectangle and trapezoid shapes are able to act as freestanding tables (Figure 3).
- When Trapezoid tops are freestanding, legs must be on the outer left and right sides (Figure 4).
- $90^{\circ}$ crescent work surfaces have provision for an optional third center leg for additional stability when heavy loads are applied to the outside edge.
They can also be used as freestanding tables when a third leg is added (Figure 5).
- All freestanding tables can be connected with optional ganging hardware.
- Freestanding tables can be ganged with connected tables in some cases, providing that the number and size of connected tables is easily movable (Figure 6).

Figure 6 - Ganging with Connected Tables

## CONNECTING CONDITIONS

- Any two worksurfaces of equal depth ( $24^{\prime \prime} \mathrm{D}, 30^{\prime \prime} \mathrm{D}$ or $36^{\prime \prime} \mathrm{D}$ ) can be connected with one leg, at the connecting or end edges (Figure 8).
- Half round work surfaces can be used in the following ways: They must be of equal width when connected to each other (Figure 7) or the connecting shapes must be equal to half the width of the connecting half round (Figure 8).
- ConnecTABLES ${ }^{\circledR}$ is designed with the leg to be fastened parallel to connecting edges, but in some cases you may wish to fasten legs at $90^{\circ}$ to connecting edges. This could allow for increased leg or knee clearance, depending on the intended use (Figure 9).
- Quarter round and $90^{\circ}$ crescent work surfaces have provision for an optional third leg for additional stability when heavy loads are applied to the outside edge. For quarter round work surfaces, it is recommended that configuration " $A$ " be used since the outside end of the center leg in configuration " $B$ " is almost flush with the outside edge of the worksurface. If configuration " B " is installed against a wall or where there will be no traffic flow, then configuration " B " can be used.

Figure 7

Configuration A

Figure 8

## Configuration B

## C CONNECTABLES® - PUTTING IT ALL TOGETHER

Legs are fastened to work surfaces utilizing a steel-to-steel connection. Each leg comes equipped with four $1^{\prime \prime} 4^{\prime \prime} \times 7 / 8^{\prime \prime}$ machine screws. Screws are inserted through the four oval shaped holes only. Do not use wood screws! When fastening legs to work surfaces, hand thread screws into position to prevent any cross threading. When all screws have been hand threaded, tighten firmly with screwdriver to secure. Optional thumbscrews can be used in place of machine screws. Thumbscrews eliminate the need for a screwdriver, whether assembling or disassembling tables. Do not use power tools for assembly of legs.

## FREESTANDING TABLES

1. Turn work surface upside-down on clean floor. (You may want to use carton from packaging as a protective assembly surface to protect the top from scratching.)
2. Position leg mounting plate holes over threaded steel inserts in top.
3. Fasten each leg to top with four $1 / 4^{\prime \prime} \times 7 / 8^{\prime \prime}$ screws.
4. Turn table right-side up.
5. Level table by adjusting glides.

## CONNECTING TABLES

1. Determine approximate location of desired configuration in room and turn work surfaces upside-down on floor. (Remember you are working in reverse.)
2. Position leg mounting plate so it is centered over the connecting edge of the first work surface. Fasten leg with two $1 / 4^{\prime \prime} \times 7 / 8^{\prime \prime}$ screws.
3. Repeat step 2 and 3 on the opposite edge of the first work surface.
4. Turn table right-side up.
5. Turn table right-side up and fasten to the previous top from the underside.
6. To add additional work surfaces repeat step 6.
7. When all the tops have been connected, level complete configuration by adjusting glides.

Note: Use the same procedures as above when using optional thumb screws.

## OPTIONAL CASTERS

1. Turn work surface upside-down on floor.
2. Remove existing glide if previously installed.
3. Fasten caster to T-leg by threading caster stem into base of T-leg and secure by tightening lock nut.
4. If casters are used in combination with gliders, level table by adjusting glides.

Note: Casters are available in locking or non-locking styles.

## OPTIONAL GANGING HARDWARE

1. Optional ganging hardware should be used when quick and frequent reconfigurations are required.
2. Turn work surfaces to be ganged upside-down on floor.
3. Remove ganging hardware from package. Holes with steel inserts are located in the corner of tops.
4. Fasten ganging hardware to each work surface with supplied thumb screws.
5. Projected arm from ganging hardware can pivot out of the way when not in use.

Shallow, $8^{\prime \prime}$ wide basket manages cable excess and serves to manage cords and cables. It can be easily unclipped from spring steel brackets (included) to rearrange cable connections from below worksurface. Spring steel brackets can suspend the Cable Basket below the worksurface where it keeps the cords and cables off the floor and manages them along the horizontal plane - between floor monuments and Storage Vertical Cable Manager, for example. Tall storage cabinet's legs provide easy access to the Cable Basket where it can easily be unclipped from spring steel brackets to rearrange cable connections. Steel wire construction, chrome finish baskets; black spring steel hanging brackets, fasteners.

BASES

- Caution: to meet BIFMA standards for performance and stability, appropriate base size must be specified with corresponding top sizes identified. Top plates and base plates vary by base size and will only work with table shape sizes as referenced on the following pages.
- Bases are constructed of a round or square solid steel metal plate for counter balance, covered with a finished steel shroud, affixed with four bolts to a $3^{\prime \prime}$ diameter cold rolled steel tube.
- GRB14H25 attach to tops with a 6 " $\times 6$ " steel plate, welded to a $1.5^{\prime \prime}$ diameter steel tube, bolted to a $0.5^{\prime \prime}$ thick solid steel counter balance. Not to be used on tops greater than 22" $\times 22^{\prime \prime}$ in size.
- GSB13H25 and GSOB13H25 attach to tops with a 6" x 6" steel plate, welded to a 1.5 " diameter steel tube, bolted to a 0.5 " thick solid steel counter balance. Not to be used on tops greater than 22" $\times 22^{\prime \prime}$ in size.
- GRB22H15, GRB22H21, GRB22H26, GRB22, GRB22H35, GRB22H41, GSB19H15, GSB19H21, GSB19H26, GSB19, GSB19H35 and GSB19H41 attach to tops with a $6^{\prime \prime} \times 6$ " steel plate, welded to a $3^{\prime \prime}$ diameter steel tube, bolted to a $0.5^{\prime \prime}$ thick solid steel counter balance.
- Top plate and base plate of GRB22 and GSB19 models in all heights, have pass-through cut-outs to accommodate a single port simplex or dual USB module to deliver power or USB charging to the surface. This allows the module to be mounted directly above the base and to pass the unit's cord through the base column resulting in the cord and plug head exiting from the bottom of the base for plugging into a floor or wall mount power source.
- GRB28, GRB34, GSB23 and GSB28 attach to tops with an $11^{\prime \prime} \times 11^{\prime \prime}$ steel plate, welded to a $4^{\prime \prime}$ diameter steel tube, bolted to a $0.375^{\prime \prime}$ thick solid steel counter balance.
- Bases are available PAINTED in Black (BLK), Tungsten (TUN) and Designer White (DWT). Paint has a "sandtex" finish for extra durability.
- Bases are available in Chrome (CH) or Brushed Chrome (BCH) at an upcharge and with an extended lead time. Please see model \# for pricing.

## textiles and finishes

## Care and Cleaning

## Textiles

Fabrics: To extend the life of your seating upholstered in fabric, regularly dust the chair to prevent airborne particles from penetrating the fabric surface

For light soiling, use a damp cloth and blot the spot with very slight pressure, taking care never to soak the fabric. Dry with a clean cloth by blotting - never rub fabric. More intense stains can be treated the same way, but with a mild detergent. Always test fabric first in an unseen area before using any cleaning method.

## Hard Surfaces

Wood Veneer Finishes: Waxing or polishing catalyzed finishes is not recommended because this will give a greasy, cloudy or uneven appearance to the product and could void your warranty. Global's conversion varnish is best cleaned by wiping the surface with a damp cloth, followed by a soft dry cloth in the direction of the grain. If the surfaces are heavily soiled, a gentle product like "Windex" can be used, following the same instructions as above.

Leather: For regular cleaning, simply use a soft damp cloth, taking care not to soak the leather. For more thorough treatment, soak a soft cloth in mild soap solution and wipe surface in a light circular motion. Repeat with clean water. Allow to dry and polish with a soft dry cloth. Do not use detergents, aerosol sprays or other polishes.

Laminate \& painted metal finishes: Simply wipe the surface with a clean soft damp cloth; if needed, a mild soap solution (i.e. Ivory dishwashing liquid) may be used. To prevent streaks, dry the surface with a clean, dry soft cloth moving in a circular motion.

## Textiles

- Water-Based Cleaner: Spot clean, using the foam only from a water-based cleaning agent, such as a mild detergent or non-solvent upholstery shampoo product. Apply foam with a soft brush in a circular motion. Vacuum when dry. Pretest small area before proceeding.
- Solvent Cleaner: Spot clean, using a mild water-free solvent or dry cleaning product. Clean only in a well-ventilated room and avoid any product containing carbon tetrachloride or other toxic materials. Pretest a small area before proceeding.
- Water/Solvent Cleaner: Spot clean with a mild solvent, an upholstery shampoo, or the foam from a mild detergent. When using a solvent or dry cleaning product, follow instructions carefully and clean only in a well-ventilated room. Avoid any product that contains carbon tetrachloride or other toxic materials. With either method, pretest a small area before proceeding.
- Vacuum Only: Clean this fabric only by vacuuming or light brushing to prevent accumulation of dust and grime. Water-based foam cleaning agents of any kind may cause excessive shrinking, staining, or distortion of the surface pile and therefore, should not be used.
- Crypton Cleaning: Generally stains are removed with plain water and powdered enzyme detergent. Upholstery foam shampoo, waterbased cleaning products and germicidal detergents can be used. Be sure to remove all residue from cleaning products with clean water. Do not use solvent-based cleaners or dry cleaning products.
- These recommendations and codes were developed by fabric specialists. However, because of the various ways fabric can be stained or damaged, there is no guarantee that the results will be completely successful. Use suggested methods on your own responsibility. To help prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is recommended. Use professional furniture cleaning services when overall soiled condition has been reached.

THE ENVIRONMENT We believe now more than ever, that it is our responsibility to protect the environment and our precious natural resources for future generations. The growing importance of energy and environmental concerns continues to challenge us in this ever changing marketplace.

As an industry leader, Global continues to take proactive steps towards reducing the negative impacts on the environment. We are building "healthier" offices; investing in Research \& Development and new technologies; reducing waste and the consumption of energy; and improving the quality of the air we breathe, all which can have a significant impact on our quality of life.

Global has the products and resources to help your projects achieve LEED certification.

New technology allows us to reduce glue usage by $50 \%$. In addition, our polyurethane glue reduces emissions and requires less energy to apply.

Use of COM must be approved by Global prior to acceptance of order. Please refer to back of the Seating List Price Book and fill out the Authorization Request Form. Photocopy and use this form as often as necessary. The customer must provide $12^{\prime \prime} \times 12^{\prime \prime}$ fabric sample and advise how the fabric is to be applied. Textile yardage requirement will be advised by the factory, and additional yardage may be required if pattern requires matching. Yardage shown in the List Price Book does not allow for pattern repeat/matching. Send to the address provided on shipping document upon approval from Global. If C.O.M. is difficult to apply or if product shall be modified, extra charges shall be made. Global reserves the right to cancel an order at any time if C.O.M. is inadequate for any reason. Customer's Own Material must be shipped freight and duties paid to our factory. Such shipment must be fully identified with purchaser's order number, RGA \# provided by Global, and the item for which material is intended. Performance of C.O.M. when applied to product is the sole responsibility of the purchaser. Global's standard product warranty shall not apply to C.O.M. Use of C.O.M. will not reduce the published list price.

## Textile Grading

All products are priced according to their standard textile grade. Lower grade textiles may be available but at the same price as standard textile grade. See Textiles and Finishes section for graded textiles.

Combining two grades of textiles may result in a revised grade. Please refer to "Two Grades Combination Chart" in the Textiles and Finishes section. For more than two textiles a special quotation is required.

## Global Purchased Material, Customer Specified (GPM)

Global may purchase material specified by the customer. Use of GPM must be approved by Global prior to acceptance of order. If it is difficult to apply or if product is required to be modified, extra charges will apply. Global reserves the right to cancel an order at any time if GPM is inadequate for any reason. Performance of GPM when applied to product is the sole responsibility of the textile vendor. Global's standard warranty will not apply to GPM materials.

## Customer's Own Leather (COL)

Not all seating can be upholstered in leather. Please consult series notes for availability. COL price is the lowest published grade for the series (leather or fabric).

## Upholstery Coverings

Slight variations in color may occur between dye lots. Although Global attempts to minimize these variances, they do occur and must be accepted as normal and will not be considered defects.

## Leather is a Natural Product

Natural variations occur in the color, grain and texture of leather. As a result, a degree of variation should be expected. As leather is used it develops a patina. Its color changes slightly, it will get marked and it will stretch and pull, these are the hallmarks of genuine leather and are not considered defects.

## Yardage

Required yardage (ydg) is based on unmatched materials with widths of $54^{\prime \prime}$ for seating, $63^{\prime \prime}$ for panels. Yardage calculations are based on imperial measurements.

## Arms

A wide selection of arms are available for some series. See Arm Chart in the Seating price list for details.

## Delays

Global's order acknowledgement will state a shipping date which is Global's best estimate at the time the order is acknowledged. However, Global shall not incur any obligation or liability to Purchaser for failure to ship by specified date unless Global has agreed to an unequivocal shipping date in a separately signed written document executed by its authorized personnel at its head office. In addition, Global shall not be liable for any loss or damage resulting from any delay or failure in shipment or other failure to perform all or any part of the agreement between the parties with respect to the goods shown on the face of the order acknowledgement where such delay, failure, loss or damage is the proximate result of any act of any governmental authority or political subdivision thereof, revolution, riot, civil disorder or disturbance, delay or default in transportation, strike disputes among or between labor unions or other labor disputes, delay or inability in obtaining materials and facilities, fire, flood, act of God or any cause not within the reasonable control of the company, whether of the class of causes enumerated or otherwise.

## F.O.B.

Additional delivery requirements such as inside delivery, lift gate, limited access sites, installations and weekend deliveries will incur an additional expense and will be the responsibility of the dealer.

## Service

Service requests are normally the responsibility of Global's authorized dealers. Where this cannot be accomplished on a local level, service problems should be referred to Global's Customer Service Department in the nearest distribution center.

## Returns

No returns of goods will be accepted without written consent and shipping instruction of Global. A minimum re-stocking charge of $35 \%$ is made on all authorized returns for credit or refund, provided goods are received by Global in the
condition in which they left the factory. This may increase depending on the type of product. Global's Return Goods Authorization (R.G.A.) numbers must appear prominently on all authorized returns. Global will not be responsible for freight costs. No credit will be given if goods cannot be reused as new. Special order items, non-stock items and C.O.M. products are in no event subject to return. All returns must be approved and authorized in writing by Global Customer Service. Global reserves the right to refuse delivery of any unauthorized returns.

## Claims

All goods are sold FOB plant or Global Distribution Center. Global is not responsible for damage which occurs in transit (or in storage). The carrier signs for all goods received in apparently good order. It is the Purchaser's responsibility to examine goods upon receipt and to file any claims with the carrier for losses or damage to the product occurring during transit, including concealed damage.

Any claims made against Global for apparent defects, errors or shortages must be made by the Purchaser, in writing, within 15 working days after any delivery. Failure by the dealer/purchaser to make any claim against Global within 15 days shall constitute acceptance of the goods and a waiver of any apparent defects, errors or shortages.

## Suspension

In the event that the dealer/purchaser defaults in the payment of any sum due to Global, or in the event the dealer/ purchaser's financial condition becomes unsatisfactory to Global, Global shall have the right to defer or discontinue shipment of any goods until such time as the default is cured or the dealer/purchaser provides assurance of payment to Global.
